DETAILED ACTION

Rejections Maintained

1. Claims 1-49 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 27 of copending Application No. 10/779526 for reasons of record made in the last Office Action of September 23, 2005.
2. Claims 1-49 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 27 of copending Application No. 10/779528 for reasons of record made in the last Office Action of September 23, 2005.
3. Claims 1-49 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-7 of copending Application No. 10/779480 for reasons of record made in the last Office Action of September 23, 2005.

Response to Arguments

4. Applicant's arguments filed March 27, 2006 have been fully considered but they are not persuasive.

At first examiner apologizes for the inconvenience caused by the typographical error in reciting the claims rejected over application 10/779526 should have been 1-49 of the instant application being rejected over claims 1-7 of the application 10/779526. Said

Art Unit: 1772

error has been corrected in the above paragraph and the argument to said rejection is addressed as such.

Regarding the ODP rejection over 10/779526, applicant is reminded that because the applications have not been allowed but have been indicated as being allowable if the ODP is overcome, the absence of filing said terminal disclaimer is either both or the child application does not overcome said ODP rejection.

Applicant argues that filing terminal disclaimers to obviate the provisional ODP rejections over 10/779528 and 10/779480 is premature. Applicant is reminded that for the claims to be allowed, applicant must take appropriate actions to overcome said ODP rejections.

Thus, in the absence of any evidence to the contrary, it remains the examiner's position that the claimed invention is rejected over the ODP as discussed above.

Allowable Subject Matter

5. The prior art uncovered so far fails to teach the self-wound multilayer laminate comprising a dry paint layer, a pressure sensitive adhesive layer overlying one surface of the paint layer, a release liner overlying the opposite surface of the paint layer, the release liner having a matte release coat on the surface adhered to the paint and an adhesive release coat on the opposite surface as recited in the independent claims.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
